

A. CHANGES TO THE SOLICITATION

1. Replace Section B, pages 2 through 3, with the replacement pages provided with this amendment.
2. Add the following definition to page 47 of 176, paragraph 5.3.1:
“Minor Repair (COSIS) Repair action taken on equipment and/or packaging that are within the PA’s capabilities and do not exceed one hour in duration per storage location.”
3. Page 37 of 176, paragraph 3.3.11, Fuels. Add the following: “Propane, If desired, will be at the PA’s expense.”
4. Page 28 of 176, paragraph 3.2.2.3, Other Equipment. Add the following: “Trailers and trays are shared by DDWG and Air Force personnel, and are available for use by the PA. However, records are not kept on the types and number available at any point in time. The inability to locate trailers and trays for the PA’s use will not be a justified reason for non-performance.”
5. Technical Exhibit 3, beginning on page 127 of 176, this amendment provides new pages which will be additional pages 129a-129d of 176. These additional pages reflect SBSS Shelf-Life Materiel.
6. Replace page 89 of 176 with replacement page 89 of 176 which reflects workload forecasts.
7. Replace page 134 of 176 with the replacement page provided by this amendment. Changes to Clause G02 are in all paragraphs, except paragraph c which remains the same.
8. Page 47 of 176, add to paragraph 5.3 “The PA will protect stock from pest infestation and report damages IAW DLAI 4145.31, Integrated Stored Products Pest Management.”
9. Page 47 of 176, paragraph 5.3.1 Requirements, delete the bullet labeled “Routine Care of Supplies in Storage (COSIS)” in its entirety and replace with the following:

“Care of Supplies in Storage (COSIS) is a program composed of a set of processes and procedures whose purpose is to ensure that materiel in storage is maintained in ready-for-issue condition or to prevent uneconomic deterioration of unserviceable materiel. With proper COSIS, supplies and equipment in storage are preserved and maintained in a serviceable condition through inspection and actions are taken to correct any forms of deterioration and to restore materiel to ready-for-use condition. COSIS includes the in-storage inspection, minor repair, testing, preservation, and packing of materiel and all intra-depot materiel movement to perform those tasks.”
10. Page 42 of 176, paragraph 5.2.1, Requirements, delete “Traffic Management” in its entirety and replace with the following:

“Traffic Management of inbound materiel includes: the overall administration and routing of commercial and government carriers to the appropriate area for offloading for materiel received from manufacturers, customers (including Foreign Military Sales), local sources and other depots; inbound non-accountable materiel; inbound directly into a storage facility or to customers; diversion and reconsignment of shipments; and, reconciling Government and Commercial Bills of Lading (GBL/CBL) with contract DD250’s.
11. Page 47 of 176, paragraph 5.3.1, Requirements, delete bullet “Rewarehousing” in its entirety and replace with the following:

"Rewarehousing includes the movement of materiel from one location to another within the installation to ensure proper storage of materiel, consolidate locations incident to the stow process, or to maximize existing warehouse space and or cube utilization. The PA shall perform normal rewarehousing incident to good storage space management practices IAW DLAM 4145.12. The PA shall develop a plan, in conjunction with the KO or designee, to maximize reduction of infrastructure over the life of this award.

12. Reference page 173, provision M03, paragraph e(2). Delete the last sentence in its entirety.

B. QUESTIONS AND ANSWERS

1. Q. Are there any inter service supply agreements or requirements in place at DDWG that the PA would be required to provide services for? If so, please provide supporting detail. This represents a considerable risk to all offerors, i.e., little or no workload (consumption data). If Data is not provided, would the Government consider providing a "plug" number for this requirement in order to level playing field vs. MEO.
 - A. Those services are included in C-5.5. Any services DDWG is providing by way of ISSA support were included in the RFP and workload given if available.
2. Q. Who is responsible for maintaining the data system to include; CPU, monitors, printers, etc.?
 - A. The Government will maintain the Government-furnished software, except if noted that software is commercially available and PA shall maintain and update.
3. Q. To assess the liability thresholds that will be borne by the bidders relating to procuring, issuing, handling a storage recycling and transportation of hazardous and radioactive materials, bidders should have some means of determining the amount and type of radioactive materials that are to be handled. Can the Government provide the bidders with the amount of hazardous and radioactive material that will be handled by the PA?
 - A. DDWG has already provided DSAC with a listing of NSN stored that are radioactive. Attached is a listing of Hazardous NIINs that the depot stores along with the Hazardous codes as appropriate. Hazardous codes are found in the DLSC/Customer Assistance Handbook.
4. Q. The solicitation references automated warehouse wireguides/pick system in Building 641 as well as Building 385. Is the automated/wireguide picking system currently operational?
 - A. B385 and B641 are equipped with wireguided Mechanized Materiel Handling Equipment. The system provides guidance to equipment as it is navigated in the warehouse bayrows; however, operators must operate controls to provide forward/backward/up/down movement of the equipment. The wireguidance system only negates the need for manual steering while accessing bayrows.
5. Q. Is there any activity other than storage required for the AGE rolling stock located on lot 32?
 - A. No; however, rolling stock is blocked with wheels off ground.

6. Q. Are certain buildings on the depot dedicated to the support of discreet customers/functions, i.e. SBSS materials seem to be stored only in buildings 351 and 364?
 - A. Retail stocks (SBSS) are primarily stored in Buildings 340, 351 and 364; however, DSS stocks, servicing various owners, are generally stored based on storage codes which are dependent upon various factors such as size, hazardous characteristic codes, and security code.
7. Q. Building 642 is highlighted in red on the handout but I do not recall stopping at that building or hearing a description of what activities take place there. What activities take place there?
 - A. Building 642 was previously used as an entry control point; however, it is no longer in use.
8. Q. Is the DLA responsible for the storage of any weapons?
 - A. No.
9. Q. Are CDLs required for on-base parts movements?
 - A. Reference paragraph 1.2.1.3b, Training and Certification to Operate/Maintain Equipment of the PWS.
10. Q. What percentage of receipts is stored at each storage location?
 - A. Do not currently track.
11. Q. Please define New Procurement.
 - A. Material received at the depot from a vendor or contractor for assignment, storage and issue to customers.
12. Q. Please define Retail.
 - A. Material received at the depot in which the owner does not equal the manager.
13. Q. Please define Wholesale returns.
 - A. Material received at the depot in which the owner and manager are the same. Excludes new procurement, retail, and unserviceable returns.
14. Q. Please define unserviceable returns.
 - A. Material received at the depot in "F" or "G" condition.
15. Q. How are these various categories of receipts identified upon receipt?
 - A. By source documentation and/or inspection.
16. Q. Please define the activities included in transshipments.

- A. Material received at a distribution site for the express purpose of direct shipment/issue to the customer.
17. Q. On page 59 of the PWS, what is meant by the term induction?
- A. Induction generally refers to the receipt of materiel and documentation by a local customer. From the PA's perspective, it corresponds to the issue (materiel and documentation) to local customers.
18. Q. Will the Government or the PA be the generator and/or repositor of all documentation relative to: Inventory accuracy, shipping, receiving, and all other activities that process through the system and have a concurrent paper trail as well?
- A. Current documentation requirements are stated in Section C-5 of the RFP.
19. Q. What is the difference between a Defense Distribution Center and a Defense Supply Center? Different Mil standards? Different reporting requirements?
- A. A distribution center is responsible for the receipt, storage and issue of supplies, parts and equipment. A supply center is an inventory control point.
20. Q. During the walkthrough, I was told that WRAFB was in surge mode. I'd like to know if it was in full surge mode of exactly what level of surge response was/is currently being provided?
- A. Kosovo support resulted in limited overall surge activity at the Air Logistics Center and, in turn, the Distribution Depot.
21. Q. On page 1 of the technical exhibit 2.2E it is stated that the materials and quantities shown represent a 30 day supply, approximately. Has this information changed or is it accurate still to assume that a quantity of 12 times the quantities shown will be the requirement for each year of the contract, approximately?
- A. There is no exact formula for determining material requirements as the workload varies from month to month. The technical exhibit reflects the on-hand balance as of 7-1-98 and represents an approximate 30-day supply. This supply list stays fairly constant.
22. Q. While touring Building 380 we observed warehouse bins "Navy 05 Account" What responsibilities does the PA have for this property?
- A. Receipt, stow, issue and inventory.
23. Q. Will there be workload data provided to show requirements for periods other than normal duty and holidays? Are there any withhold/deduct amounts for failure to meet APLs?
- A. 24% of MROs are received after 1400. This solicitation does not have a provision for deducts.
24. Q. A chart indicated Government office equipment list. Section C-3, paragraph 3.2.2 states IAW FAR 52.245-11(G) the PA is responsible for the maintenance of Government furnished plant equipment. Who is responsible for replacing Government plant equipment no longer serviceable?

- A. The PA is responsible to ensure he/she has the equipment to perform the requirements of the PWS. The Government will only consider replacing the capital investments for complete MMHS.
25. Q. Paragraph C-3, 3.2.4.1.1 page 31 makes a reference of the requirement to use DSS to manage weapons (small arms). However, no workload data was provided nor were any weapons storage facilities identified during the tour. If there is a requirement to store weapons, any workload data be provided?
- A. This paragraph describes the functions DSS performs. Not all depots use all the DSS functions. DDWG does not manage weapons.
26. Q. What manual systems are used to process shipments, receipts and issues?
- A. The paragraph C-3,3.2.4.1.1 refers to PPP&M manual and not a manual system.
27. Q. Are supplies and material used for maintenance/repair reimbursable to the PA?
- A. No, supplies and materials used for maintenance/repair are not reimbursable to the PA.
28. Q. Tools for the repair of MHE/MMHS are not listed in TE 2.2.A. Will they be made available to the PA?
- A. Additional tables have been added to TE 2.2 as TE 2.2 h
29. Q. Paragraph C-5, 5.3.2 page 41 states PA will maintain the inventory accuracy rates listed in 5.3.2 (APL). There are wholesale items managers and retail inventory managers processing transactions that affect inventory balances. How can the PA be held accountable for maintaining standards (APLs) for which they have no control?
- A. The item managers cannot make adjustments to the accountable record; only the PA can do that. The Item Managers can only request transactions be completed (issues, disposals, etc.) which the PA is required to perform. The PA's accuracy or inaccuracy in performing the transactions determines the accuracy of the inventory.
30. Q. Will the PA be required to provide computer paper; labels for bins and property, and other related items?
- A. Yes, the PA will be required to provide computer paper, labels for bins and property, and other related items.
31. Q. During the site visit we observed the DDWG Duty Officer vehicle. There is no reference in the RFP to a DDWG Duty Officer. Can you please explain?
- A. Inasmuch the PWS does not address a Duty Officer, the requirement does not pertain to the solicitation.
32. Q. Can you provide some indication as to the number of miles of conveyor systems which are currently installed in the warehouses?
- A. Approximately 21 miles.
33. Q. What type of communication equipment is currently used by DDWG? What frequencies are being used?

- A. Radios, pagers, and cell phones; all frequencies are managed by the host.
- 34. Q. Who is responsible for maintaining the data system to include; CPU, monitors, printers, etc.?
 - A. PA performs initial maintenance on all equipment. If PA is unable to correct problem for DSS equipment they should call the Office of the Commander, DDWG. All other equipment maintenance and repair is the responsibility of the PA.
- 35. Q. Planograph requirements need clarification.
 - A. The DDC just implemented a planograph policy 3/25/99. The software and planographs are expected to be in place prior to any contract award. The PA will be responsible for maintaining the planographs and software IAW the policy.
- 36. Q. Define semistk and semilow flat bed trailers.
 - A. Semistk is a 40-foot conventional trailer; semilow is a low boy.
- 37. Q. Request the number of GSA vehicles currently in use and the type.
 - A. Offerors should determine requirements for equipment that is not government-furnished based on the work described in the solicitation; the Government will not provide the number and type of GSA currently in use.
- 38. Q. An amendment to the RFP was published giving MIS data on various volume types processed at DDWG. What are the labor rates currently associated with each of the volume categories?
 - A. Labor or productivity rates will not be provided; offerors should determine labor needs based on the stated requirements.
- 39. Q. The RFP states that the PA is responsible for providing transportation for local shipments (within 5 miles of the base). How much of this activity is there and what is the frequency?
 - A. As stated in RFP Section C-1.1, on-base issues to customers currently make up approximately 55-60 percent of issues. Amendment 1 also provides monthly volume.
- 40. Q. Section 3.2.2.2 states the PA is responsible for maintaining all MHE. In an earlier Q & A, the Government stated MHE maintenance would be Government furnished via an existing maintenance contract. Which is correct?
 - A. The solicitation takes precedence; the PA is responsible for maintaining all MHE.
- 41. Q. RFP section C-3 and Technical Exhibits 2.2A through 2.2D Motor vehicles (trucks, vans, pickups, etc.) are not found as GFE. Will the Government please provide a listing, by types and quantity, of all motor vehicles currently in use at DDWG?
 - A. A listing of current GSA vehicles will not be provided. Offerors should determine requirements for equipment that is not government-furnished based on the work described in the solicitation.

42. Q. Reference Section B, Pages 2 and 3, Line items 0001 and 5001, how will the PA protect against DRO's/RDO's being sent to the depots where extremely large quantities of material must be picked and shipped under just a couple DROs/RDOs? An example would be "Lasts" at DDCO. If our agreed-to unit rate is \$25, the PA could be compensated only \$25 to pick and ship an entire warehouse full of material!

A. Technical Exhibit 1A provides data for the average quantity per line transaction; this includes DRO/RDO items. As defined, Line Item is a single NSN with any quantity.

43. Q. Will the Government issue a DD Form 254 reflecting the security requirement? Where the classified document and material stored? Who has control of the storage facility how much coordination is necessary in cases of priority requirements?

A. The DoD Contract Security Classification Specification, DD Form 254, will be issued pending resultant award and completed prior to the end of the transition period. Classified storage/documents encompass two lots and warehouses. Due to security reasons, the exact location remains suppressed. The PA will have control of the storage facility with coordination as necessary regarding priority requirements with the DDWG Command Group.

44. Q. Section L, paragraph L13 (a) and L16 (b), the solicitation require that proposal covers and diskettes include the date of submission and each page of every volume be dated?

A. The referenced paragraphs do not state any requirement to date each page of every volume. It does require the outer cover (and label for diskettes) of each volume be clearly identified as to volume number, volume name and copy number, RFP, date of submission and offeror's name. Additionally, if a proposal is submitted prior to receipt of an amendment that effects a change to the proposal, only replacement page(s) are to be submitted as page changes and marked with the appropriate amendment number and date of amendment that effected a change in initial proposal. As applicable, replacement diskettes should also be provided.

45. Q. Please confirm and clarify the paragraph references that are cited under each CLIN as to what is required to price for each CLIN. It appears that several incorrect references are included under the CLINs?

A. The attached replacement pages for Section B in this amendment provide correct references.

46. Q. In Section B, paragraphs 3.2.2.1 and 3.2.2.2, there is a requirement for the PA to be responsible for maintaining all MMHS and MHE in accordance with manufacturer's recommendations/specifications and in compliance with equipment warranties and be responsible for daily operator maintenance. However, there is no where to provide a cost estimate for this requirement in Section B of the solicitation?

A. The Government does not require separate cost for this requirement.

47. Q. What is a Cargo Mover?

A. As described in Technical Exhibit 2.2B (page 111 of 176) a cargo mover is an 8-ton (transporter). This flatbed truck has rollers, a bed that will move up or down, a blue canvas removable top, and removable sides. It is used to transport items delivered to Warner Robins customers.

48. Q. The hourly rate for all levels of Truck drivers appear to be low. Please validate the rates

listed.

- A. The wage determination is correct.
49. Q. Section B, Line Item 0001 requires us to provide a price per line item based on the requirements in the PWS as defined in Section C, paragraphs C5.1 through C5.3, C5.5.4 and C5.5.9 of the solicitation. However, paragraph C5.4 is not included yet it includes the requirements for issuing property-one of the primary requirements of DDWG.

A. This has been corrected with this amendment.

SECTION B, SUPPLIES OR SERVICES AND PRICES/COSTS

BASE PERIOD (36 MONTHS)

LINE ITEM

REPLACEMENT PAGE 134 of 176

(X) G01. The Administration Contracting Officer (ACO) shall be designated below at time of award for information relating to contract administration.

(X) G02. INVOICING INSTRUCTION

- (a) Invoices/vouchers shall be submitted no later than the fifth (5th) working day after the end of the previous month. The amount claimed to be due for services rendered shall be indicated for Contract Line Item Numbers (CLINS).
- (b) The contractor shall prepare seven (7) copies of the invoices/vouchers. The original and five copies of the invoices/vouchers will be forwarded to the COTR for certification. The COTR will then forward the original and four copies to the appropriate Defense Finance and Accounting Service office as indicated on the Standard Form 33 of the contract for payment. The fifth copy will be forwarded to DDC-R for informational purposes. One (1) information copy will be forwarded to the Administrative Contracting Officer (ACO).
- (c) Invoices/vouchers will contain the following information:
 1. Contract Number, Delivery Order Number and/or Modification Number, and CLIN.
 2. Description of Work.
 3. If applicable, hourly rates, and number of labor hours.
 4. If applicable, other costs incurred and allowable under the contract and identification of such costs.
 5. A certificate for the COTR's signature stating:

(I have reviewed invoiced/vouchered costs and certify that they appear correct and accurate.)

(COTR Signature)

(d). Invoices/vouchers for 5.5 Special Functions will be submitted no later than the tenth (10th) working day after approved workload/project is completed with the following information:

1. Contract Number, Delivery Order Number and/or Modification Number, and CLIN.
2. Description of Work.
3. If applicable, hourly rates, and number of labor hours.
4. If applicable, other costs incurred and allowable under the contract and identification of such costs non-labor costs, which includes supplies/material and services.
5. A certificate for the COTR's signature stating:

(I have reviewed invoiced/vouchered costs and certify that they appear correct and accurate.)

(COTR Signature)
